EDIT THE PASSGE

Paragraphs one and two contain three mistakes each and third paragraph has four mistakes.

1. Marie Curie was one of the most accomplished scientist in history. Together with her husband, Pierre, she discovered radium, the element widely used for treating cancer, and studied uranium and other radioactive substances. Pierre and Marie's amicable collaboration later helped to unlocking the secrets of the atom.

2. Marie was born in 1867 in Warsaw, Poland, where her father was a professor of physics. At an early age, she displayed a brilliant mind and a blithe personality. Her great exuberance for learn prompted her to continue with her studies after high school. She became disgruntled, however, when she learned that the university in Warsaw was closing to women. Determined to receive a higher education, she defiantly left Poland and in 1891 entered the Sorbonne, a French university, where she earned her master's degree and doctorate of physics.

3. Marie was fortunate to have studied at the Sorbonne with some of the greatest scientists of her day, one of whom was Pierre Curie. Marie and Pierre were married in 1895 but spent many productive years working together in the physics laboratory. A short time after they discovered radium, Pierre was killed by a horse-drawn wagon in 1906. Marie was stunned by this horrible misfortune and endured heartbreaking anguish. Despondently she recalls their close relationship and the joy that they had shared with scientific research. The fact that she had two young daughter to raise by herself greatly increased her distress.

UNDER LINE THE MISTAKES AND WRITE THE CORRECTION DOWN

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
